

CHEMICALS

Your Partner in Profitability™

CHEMICALS

Your shop needs to be ready for whatever repair rolls in the door.

With Kent's industry-leading chemicals, you'll always have:

- Hardworking, time-saving, cost-effective solutions — every time
- Products made for your specific application
- OEM-quality results

We're Your Partner In Profitability

Seam Sealers & Applicators

When it comes to auto body work, the best results are those you don't even see. Our line of seam sealers and applicators gives you the power to achieve aesthetic excellence without sacrificing structural integrity or your shop's cycle time.

Check out our range of fast-curing, OEM-compatible seam sealers and system-matched applicator guns.

Flex-E-6000™ Seam Sealer

This two-component seam sealer is 10 times stronger than ordinary one-part sealers without shrinking, cracking or sagging. Flex-E-6000™ offers all-surface versatility, cures rapidly and is 100% VOC-free.

- Approved by Ford and GM for off-line repairs
- Working time: 8-10 minutes, sands in 20 minutes
- Paintable in 30 minutes
- Curing time: 2 hours

High-Tech™ Clear

Developed as a problem-solving, water-clear sealer, High-Tech™ Clear is thick, flexible and quick to skin over. It can be applied to wet or dry surfaces across many applications, such as door skins, drip rails, tail lights and trunk seams.

- Approved by Chrysler, Ford and GM for off-line repairs
- Adheres to all auto paints and mixes well with paint to color-match seams
- Smooth feathering for undetectable repairs
- Does not yellow, crack, peel or shrink

Two-Part Products Create Solid Bonds

An innovator in two-part products, Kent has delivered the advantage of powerful adhesion to customers for more than a quarter of a century.

Pneumatic Applicator Gun

Gain greater control and produce OEM-like results with this pneumatic gun. Featuring aluminum and steel construction with easy flow adjustment controls for use with all Kent dual cartridge products.

Adhesives

With Kent Automotive's line of adhesives, you'll get unbeatable product strength without having the burden of lengthy drying and curing times. As one of the pioneers in glass bead technology, Kent Automotive offers adhesives that deliver maximum adjustment time and improved control. And when you've got a long line of jobs to get out the door, every minute matters.

Panel Adhesive – 2:1

Designed for non-structural repairs, Panel Adhesive – 2:1 seals and bonds in one step while providing superior impact strength and reducing the need for welding, fasteners or rivets.

- Fills gaps up to 1/2" without sagging
- Features glass beads for borderline control
- Exceeds requirement for FMVS Standard 301
- 90-minute work time; curing can be accelerated with heat
- Provides added corrosion protection

Quick Stick Double Sided Tape

This high-strength acrylic tape provides instant contact to all auto paints — even clear coats — on applications such as body side-moldings, trim, emblems, stripping and cladding.

- Great cold temperature adhesion, sticks exactly how it's placed
- Gray foam cell structure

Super Bond™ Adhesive

This fast-curing cyanoacrylate adhesive bonds rubber, metal, plastic and ceramic in seconds. Powerful and economical, you can use one drop per square inch. The product's high viscosity ensures it stays where you put it so you can precisely control dispensing.

- Cures in 5 to 60 seconds, or instantly with activator
- Unique non-clog cap
- Fills gaps up to 0.016" (0.4mm)

Plastic Repair & Refinishing

When it comes to repairing plastic, it's easy to get stumped about which product to use. Kent Automotive helps you quickly identify the right repair material just by knowing the flexibility of the plastic.

On top of that, we help you save on materials costs and man-hours by formulating products that let you skip extra prep and use of adhesion promoters, and cure in as little as 15 minutes. Another great benefit? All Kent Automotive plastic-repair products are 100% VOC-free so you're compliant with environmental regulations and safeguarding employee health.

Chem-Weld E-P

This specially formulated two-part compound is designed to work with all semi-rigid plastics — no need for specific identification of materials. Skip special preparations and adhesion promoters while achieving excellent adhesion results without cracks or shrinkage.

- Working time: 5 minutes
- Sands and feathers in 15 minutes
- Paintable in less than 30 minutes
- Completely free of solvents, VOCs and isocyanates

Kent-Glaze

Use this flowable glazing putty when performing repairs to flexible and semi-rigid thermoset and thermoplastic body panels. Kent-Glaze is the ideal product for finishing off repairs made with Chem-Weld E-P, filling in gouges, pinholes and sand-scratches. Just like Chem-Weld E-P, no special prep or adhesion promoters are needed.

- Working time: 4 minutes, sands in 15 minutes
- Paintable in less than one hour
- Does not shrink, crack or bubble paint

Plastic Quick Fix

Tackle all kinds of repairs, even rips and tears, on a broad range of plastics using this quick-acting two-part compound.

- Working time: 2 to 3 minutes, sands in 10 minutes
- Paintable in 30 minutes
- Can be used on PP, EPDM, Xenoy®, ABS, PPO, RIM, etc.

Corrosion Protection

Staving off corrosion and rust is absolutely critical to protecting a vehicle's structure and performance. Kent Automotive has an array of products and application tools that help you tackle these critical tasks and restore the original level of factory protection.

Inner Panel and Heavy Duty Rustproofers

Choose our superior wax-based penetrating rust and corrosion preventer for all inner panel metal surfaces. For outer panels, Kent Automotive's heavy-bodied, Heavy Duty Rustproofers stays where it's sprayed, providing maximum protection.

Aerosol Extension Wand

It's no secret — reaching all those hidden areas is a tough, time-consuming task. Exclusively designed with our customers in mind, Kent Automotive's extension wand is the perfect tool for applying rustproofing in areas such as frame rails, quarter panels and cowl.

- Three-foot-long wand
- 360° spray nozzle
- Works with both inner and outer rustproofers, part numbers P60305 and P60310

Weldable Copper Primer

Restore protection on inner, outer and structural body panels with this one-part weldable copper primer. It dries quickly with less clogging and less spatter.

- Protects inner, bare steel surfaces during spot welding
- Copper powder means greater conductive properties
- Excellent for all applications

Rubber Guard

Protect against abrasion and deaden noise in wheel wells, door skins, trunk area and seams with this easy-to-apply, quick-drying and rugged product.

- Easy-to-use aerosol, matches OEM color, finish and texture
- Convenient application via siphon spray gun (with one quart cans)
- 100% CFC free

Specialty Chemicals

Our long history and close customer relationships have helped us develop specific solutions to unique problems. That's why we've created a wide array of specialty chemicals.

Acrysol™ Surface Cleaner

This industry-leading auto body degreaser preps surfaces without leaving behind a sticky residue or lingering odor. It's also our best selling product.

- Fast-acting
- Safe on most painted or plastic surfaces

Fiber Fix

A carbon fiber enriched polyester filler that offers exceptional repair qualities.

- Carbon fiber for added strength
- Prevents swelling
- Resists staining and shrinkage
- Eliminates halo effect
- Easy to sand in 10-15 minutes
- Excellent corrosion control

Euro-Black Satin Trim Finish

Achieve a perfect finish and color match on trim with this product; formulated specifically for aluminum, stainless steel and chrome.

- Self-priming on bare metal, resists chipping, cracking and peeling for long-lasting durability
- Superior adhesion on bare metal and hard plastic trim
- Dries fast so parts can be handled quickly
- Available in aerosol or quart cans

Controlled Flow Finishing Glaze

Repair and seal sanding scratches and other minor imperfections for a picture-perfect look.

- Adheres to body filler, aluminum and steel
- Prevents staining over body filler
- Available in flowable, controlled flow or heavy-body grade

Shield And Save Time

No more taping off sections of a vehicle. Simply spray on liquid mask, get to work and rinse it off when you're done.

Ready-to-Use Liquid Mask

Protect your work and workspace against something that can kill your schedule — paint and primer overspray.

- Dries firm and does not adhere to skin or clothing
- Dissolves easily with cold water
- Clear, ready-to-use formula
