

## PROBLEM SOLVER

### PROBLEM:

**Special equipment is typically needed for aluminum repairs.**

- MIG or TIG equipment and inert shielding gases may not be readily available.
- Poor weldability with spatter and inconsistency of deposit.

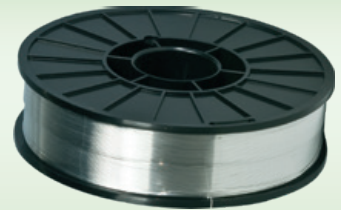

*Cronatron*  
A LAWSON PRODUCTS BRAND

### SOLUTION:

**Cronatron® 510 Non Heat-Treatable Aluminum Electrodes and Wires**

- No Special Equipment Required
  - Allows you to use your existing D/C stick welding machine.
  - No time-consuming equipment changes or gases.
- Can also be used as a gas welding or brazing rod if all you have is oxy-fuel equipment
- Polarity: DC reverse
- Hold a tight arc and produces a consistent weld bead.
- Perfect color match for aluminum.

### APPLICATIONS:

- Boat repairs
- Aluminum castings
- Piping
- Appliances
- Trailers
- Farm equipment

### INDUSTRIES:

- Agriculture
- Marine
- Transportation
