

## PROBLEM SOLVER

### PROBLEM:

**It can be difficult to remove greases, oils, and grime without using harsh solvents.**

**Many cleaner/degreasers:**

- Contain dangerous and highly flammable solvents.
- Are too weak, requiring more time and energy to clean.
- Are not safe on painted surfaces and plastics.
- Leave a film residue behind.

**DRUMMOND®**  
A LAWSON PRODUCTS BRAND

### SOLUTION:

**Drummond® Keynote, the heavy-duty choice for cleaning and degreasing**

- Non-flammable and water based – contains no petroleum or chlorinated solvents.
- Highly effective; quickly breaks down heavy deposits of greases, oils, baked-on carbon, and ink.
- Strong, yet safe – won't harm most water-safe surfaces.
- Washes away suspended soil without redepositing – leaving surfaces film-free.

### FEATURES:

- Concentrated – dilute with water for light, medium, and heavy-duty cleaning jobs
- Performs well with hot and cold water
- Formulated without phosphates – safer for waterways and marine life

### APPLICATIONS:

- Highly versatile – apply using pressure washers, floor scrubbing machines, tank sprayers, mops, or trigger sprayers
- Works on a wide range of surfaces including most metals, concrete, brick, enamel, chrome, laminated plastic surfaces, rubber and plastic
- Acceptable for use in federally inspected meat and poultry plants

### INDUSTRIES:

- Food Processing
- Manufacturing
- Education
- Government
