

PROBLEM SOLVER

PROBLEM:

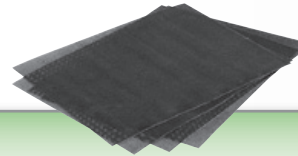

Ordinary abrasives are wasteful and need to be replaced often.

- Waste creates high cost.
- Most only have one abrasive side.
- They load up rapidly and need to be replaced.
- Abrasives cannot be used in wet or oily conditions.

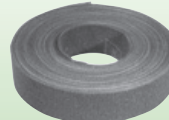

SOLUTION:

Tuff-Grit™ Screen Mesh Abrasives

- Outlasts ordinary abrasives 3-to-1.
- Can be used on both sides.
- Eliminates particle buildup.
- Can be used with water, solvents or oil.

Sheets

Rolls

Assortment Pack
88597

APPLICATIONS:

- Rough surface sanding
- Polishing commutators
- Armatures and brakes
- Deburring shafts
- Glass, plastic, fiberglass
- All types of metal
- Wood
- Pre-soldering applications

INDUSTRIES:

- Agriculture
- Automotive
- Construction
- Education
- Equipment rental
- Government
- Hospitals
- Hotels
- Marine
- Mining
- Oil & Gas
- Property Management
- Transportation
- Utilities
- Warehousing

Screen mesh is impregnated with silicon carbide
