

Zinc-Rich Weld-Through Primer Testing & Results

This bulletin is proprietary information of Kent Automotive.

An independent laboratory compared the following four different weld-thru primers:

1. Kent Zinc-Rich Weld-Through Primer - 1618169
2. Competitor #1
3. Competitor #2
4. Competitor #3

Each Welded test panel was prepped and had 2 coats of product applied according to the instructions on the can. The welded test panels were then exposed to the ASTM-B117 Standard Salt Spray Test for 160 hours. The results of the testing are shown below.

ASTM-B117 Standard Salt Spray Test After 160 hours

(Results in order from 1-4)

8770 W. Bryn Mawr, Suite 900, Chicago, IL 60631-3515
